Career Objective

To pursue a highly challenging and creative career, where I can apply my existing knowledge and creativity, acquire new skills and contribute effectively to the organization.

Projects

2022- final Year Project

Automated Dustbin Spillage Detection Using Esp8266.

- The project is about making the dustbin into a smart dustbin with the help of IoT. The smart dustbin will open automatically when the public comes closer to the dustbin. And it will give alert messages based on the amount of dustbin filled through emails.

Mini Project

Bus Booking Management System using JAVA EE

- Bus Ticket Booking System is an E-commerce Website designed to provide easy booking and user friendly to the user and It stores customers personal data records, drop points, and other information in database
